EDUCATION

McMaster University

Sept. 2023 - May 2027

B.Eng in Software Engineering CO-OP; GPA: 3.9/4, 11.1/12

- McMaster Google Developer Student Club (Open Source Lead), McMaster AI Society, Varsity Fencing (Sabre)
- Relevant courses: Software Design, Concurrent Design, Large System Design, Computer Architecture, Object-Oriented Programming, Data Structures & Algorithms, Databases, Software Requirements & Security, Linear Optimization

TECHNICAL & SOFT SKILLS

Programming Languages: TypeScript, JavaScript, Java, Python, C, C#, SQL, Assembly (ARM64, LEGv8)

Frameworks/Libraries: Next.js, React, Vite, Tailwind CSS, Framer Motion, Node.js, Flask, TensorFlow, Numpy, PIL, Express.js, Angular, Three.js, PostCSS, Electron

Tools/DevOps: Git, GitHub, Vercel, Firebase, Jest, ESLint, Jira, Sanity CMS, Figma, Linux, VSCode, Unity, Arduino, Supabase

Soft Skills: Communication, Collaboration, Initiative, Problem Solving, Technical Writing, Time Management, Adaptability

WORK EXPERIENCE

Software Developer & Outreach Coordinator

February 2025 - Present

Jetson Infinity | Hybrid | Hamilton, ON, Canada

- **Designed and developed** a cross-platform desktop app (**Electron, Next.js, Flask**) to control Jetson Infinity's robotic arms.
- Designed the final assessment for the Python, ML, and computer vision modules on the online learning platform.
- **Led outreach** and **facilitated** robotics & AI workshops at university and science centre-affiliated STEM camps across Canada.
- Created a technical support FAQ and provided **IT support** for platform and hardware troubleshooting.
- Presented at conferences (e.g., FIRST Robotics Canada), pitching to educators, and handling sales and follow-ups.

Web Developer and IT Support Technician

July - Aug 2024

Black Rose Guitar House | Acton, ON, Canada

blackroseguitarhouse.com

- Developed the new eCommerce website (Instant Site, HTML, CSS, JavaScript) and managed **domain transfer** and **hosting**.
- Enhanced the company's online presence with a modern, responsive, and user-friendly design, increasing site traffic by **118%** and unique visitors by **500%** in two weeks.

Online Data Analyst

April - Dec 2024

TELUS Digital | Remote

- **Enhanced** AI and machine learning models by **assessing** the relevance, accuracy, and other features of various media, including AI-generated voices, search engine results, generative AI responses to search queries, and more.
- Established a strong familiarity with **SEO** and best practices through assessments and ratings.

SOFTWARE PROJECTS

Corkboard - Mobile App

September 2025 - Present

React Native, TypeScript, Tailwind, Supabase, Flask, Python

github.com/DSC-McMaster-U/corkboard-open-source

- Planned, led, and managed a 10-person cross functional team as Project Lead and Scrum Master, overseeing sprint planning, development, and delivery of an open-source mobile app for local music event discovery.
- Developed a React Native frontend with TypeScript components and Tailwind styling for map and feed-driven event discovery.
- Designed and managed a Supabase-backed database to store events, venues, user-submitted content, with moderation workflows.
- Built a Python Flask backend with web-scraping pipelines to process and serve live music event data from public sources.

GDSC: Website, Mac-a-Thon Website

October 2024 - March 2025

Next.js, TypeScript, Tailwind, Sanity CMS, Firebase, Vercel, Jira, Jest

gdscmcasteru.ca/, mac-a-thon.gdscmcasteru.ca/

- Collaborated in an **agile team** to design, develop, and deploy modern, responsive, **Material Design**-compliant websites.
- Created and maintained feature-specific Git branches, ensuring clean code reviews and integration into the main branches.
- Integrated **Sanity CMS** for **dynamic content updates**, enabling non-technical contributors to manage the site.

Mac AI Society: Art Suggester AI

October 2024 - April 2024

React, JavaScript, Figma, TensorFlow, Numpy, PIL, Python

github.com/McMasterAI2024-2025/ArtSuggesterAI

- **Preprocessed** datasets for two **CNN TensorFlow models** and user-uploaded images in a **Flask-based API**.
- Improved the accuracy of colour detection for user-uploaded images by implementing edge and saturation-based thresholding.
- Led the frontend team, managing task allocation and timelines using Kanban boards, and designing **UI/UX** using **Figma**.
