EDUCATION

McMaster University

Sept. 2023 - Expected April 2028

B.Eng in Software Engineering CO-OP; GPA: 3.9/4, 11.1/12

- McMaster Google Developer Student Club (Open Source Lead), McMaster AI Society, Varsity Fencing (Sabre)
- Relevant courses: Software Design, Concurrent Design, Large System Design, Computer Architecture, Object-Oriented Programming, Data Structures & Algorithms, Databases, Software Requirements & Security, Dynamic Systems & Control

TECHNICAL & SOFT SKILLS

Programming Languages: TypeScript, JavaScript, Java, Python, C, C#, SQL, Assembly (ARM64, LEGv8), MatLab, Rust,

Frameworks/Libraries: Next.js, React, Tailwind, Node.js, Flask, TensorFlow, Numpy, PIL, Express.js, Three.js, Electron, Tauri

Tools/DevOps: Git, Vercel, Firebase, Jest, Jira, Sanity, Figma, Linux, Unity, Supabase, MongoDB, Okta, Mosyle, AWS, Meraki

WORK EXPERIENCE

Cybersecurity Intern

July - Present

FloSports | Waterloo, ON, Canada

- Designed and implemented an AI governance framework, including acceptable use policies, a risk-assessment framework, and detection and enforcement mechanisms to control AI usage and mitigate data leakage risks.
- Developed a Python-based shadow AI discovery tool that aggregates data from Okta, Google Workspace, and Cisco Meraki APIs, producing risk-classified reports, integrated directly into the internal TechOps dashboard.
- Supported cybersecurity and IT operations across a modern cloud/SaaS stack (AWS, Okta, GWS, Mosyle, Meraki, DattoEDR)

Software Developer

February 2025 - July 2026

Jetson Infinity | Hamilton, ON, Canada

- Developed, tested, and deployed a cross-platform desktop application (Electron, Next.js, Flask) used by school boards across Canada for robotic arm control, supporting real-time device communication and motion sequencing.
- Authored assessments and technical learning content for Python, machine learning, and computer vision training modules.
- Created technical documentation and troubleshooting resources for software and robotics hardware, while providing in-person and remote support to educators and platform users.

Web Developer and IT Support Technician

July - August 2024

Black Rose Guitar House | Acton, ON, Canada

blackroseguitarhouse.com

- Developed the new eCommerce website (Instant Site, HTML, CSS, JavaScript) and managed domain transfer and hosting.
- Enhanced the company's online presence with a modern, responsive, and user-friendly design, increasing site traffic by 118% and unique visitors by 500% in two weeks.

SOFTWARE PROJECTS

Corkboard - Mobile App

September 2025 - Present

React Native, TypeScript, Tailwind, Supabase, Express.js, Python

github.com/DSC-McMaster-U/corkboard-open-source

- Led 10-person cross-functional open-source team as Project Lead and Scrum Master, coordinating sprint planning, development, testing, code reviews and delivery of an open-source mobile app for local music event discovery.
- Developed a React Native frontend with TypeScript and Tailwind for map-based and personalized event discovery.
- Designed and managed a Supabase-backed database to store events, venues, user content, etc., with moderation workflows.
- Built an Express.js backend with web-scraping pipelines to process and serve live music event data from public sources.

GDSC: Website, Mac-a-Thon Website

October 2024 - March 2025

Next.js, TypeScript, Tailwind, Sanity CMS, Firebase, Vercel, Jira, Jest

github.com/DSC-McMaster-U

- Collaborated in an agile team to design, develop, and deploy modern, responsive, Material Design-compliant websites.
- Created and maintained feature-specific Git branches, ensuring clean code reviews and integration into the main branches.
- Integrated Sanity CMS for dynamic content updates, enabling non-technical contributors to manage the site.

Mac AI Society: Art Suggester AI

October 2024 - March 2025

React, JavaScript, Figma, TensorFlow, Numpy, PIL, Python

github.com/McMasterAI2024-2025/ArtSuggesterAI

- Preprocessed datasets for two CNN TensorFlow models and user-uploaded images in a Flask-based API.
- Improved the accuracy of colour detection for user-uploaded images by implementing edge and saturation-based thresholding.
- Led the frontend team, managing task allocation and timelines using Kanban boards, and designing UI/UX using Figma.
